To Whom it may concern.

It is the policy of the Division of Water Resources to allow construction of a fire well. The well drilling and pump installation must be done by a licensed well driller and the pump installer. Form GW45 should be used for permit application to the State of Colorado.

In addition, this well may only be used for fire purposes. Signage should be installed to inform others of the permitted use.

If you have any questions feel free to give me a call.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bruce J. Smith". The signature is written in dark ink and is positioned above the printed name.
